Front-end Engineer | Technical Leadership

Front-end Engineer with 4+ years of experience building scalable, multi-tenant platforms using React and Next.js. Strong background in architectural decision-making, white-label systems, internationalization (i18n), and performance-critical UI development.

Experience leading front-end initiatives, mentoring junior developers, and collaborating with tech leads and stakeholders to deliver maintainable, high-performance production systems.

Professional Experience

WA Technology – Global | Front-end Engineer | Technical Lead (Jan 2024 – Aug 2025)

- Technical reference for a front-end team of 4 interns, providing architectural guidance and code reviews.
- Contributed to architectural decisions impacting scalability and long-term maintainability.
- Built high-conversion landing pages and scalable features for an international multi-market platform.
- Implemented advanced caching strategies (React Query, SWR) improving performance and reducing redundant requests.

Independent Front-end Consultant (2025 – Present)

- Designed and implemented multi-tenant architecture with dynamic branding and runtime configuration.
- Structured scalable UI patterns to support complex business and financial rules.
- Implemented internationalization and SEO-aware metadata strategies for white-label deployments.
- Delivered PWA-ready platform optimized for performance and reliability.

Additional Experience

Senfio – Mid Level Front-end Developer (Aug 2025 – Jan 2026)

- Contributed to a real-time monitoring PWA for temperature-sensitive environments and embedded devices.
- Built complex data visualization interfaces using React, Next.js, and TypeScript.
- Implemented caching and state management strategies to improve reliability in operational contexts.

NE Intermediações e Tecnologia LTDA – Mid Level Front-end Developer (Jun 2023 – Aug 2025)

- The company later acquired; operated as a complementary front-end structure aligned with WA Technology initiatives.
- Developed React-based SPAs for marketing and operational platforms.
- Mentored interns, conducted code reviews, and ensured production-grade UI quality standards.

Core Competencies

Multi-tenant Systems, White-label Platforms, UI Architecture, Internationalization (i18n), React, Next.js, TypeScript, React Query, SWR, Context API, Tailwind CSS, ShadCN UI, PWA, REST APIs, Node.js, PostgreSQL, Testing (Jest, Vitest, Cypress), CI/CD, Git, Docker
